Tips to Help You Golf Like a Pro

**Tip #1 – Cure a Slice**

- Place a tee behind, and to the outside of, your driver.

- If you hit the tee on your swing, your swing is outside-to-in, causing a slice. This is BAD.

- Try not to hit the tee, to ensure your swing is inside-to-out. Good job!

**Tip #2 – Weight Distribution**

- Your back foot should rotate and lift during your follow through.

- To practice this, place a wedge under your heel. Move your weight from back foot to front during your downswing, thus allowing the wedge to fall to the ground.
